Summary

Software engineer with a systems-driven mindset and a passion for continuous learning, bringing a background in industrial engineering and export operations that strengthens problem-solving and efficiency. Experienced in full-stack development with JavaScript, Python, React, Node.js, and Django, I thrive in cross-functional Agile teams and value collaborative, positive work cultures. Eager to apply my skills to build intuitive, scalable web applications and deliver impactful solutions.

Education

General Assembly Remote April 2025 – July 2025

Completed Software Engineering Immersive, 500+ hours of hands-on training, project work, and mentorship. Delivered individual and group projects from user research through prototyping, testing, and final presentations using Agile methodologies and version control (Git/GitHub).

North American University Remote August 2025 – Present

Master of Science in Computer Science. Coursework: Computer Networks, Software Engineering, Advanced Software Engineering, Introduction to Computer Science

Aksaray University Aksaray, Turkey 2016 – June 2020

Bachelor of Science in Industrial Engineering. Completed internships in production and management. Contributed to a LEGO-based manufacturing simulation project with Mercedes-Benz as part of a student team.

Programming Competencies

Web Development: HTML5, CSS3/Bootstrap, MERN Stack
Languages: JavaScript, Python
Frameworks: React, Node.js, Express.js, Django
Databases: MongoDB, PostgreSQL (basic SQL)
Deployment: GitHub, AWS S3
Concepts: RESTful APIs, CRUD Operations, Agile Development
Software: VS Code, Postman, Trello, CLI

Recent Projects

Connectly

Social Storytelling Web App (Team Project) [Live Site](#) | [GitHub](#)
Collaborated with a team of three to implement post creation, filtering, commenting, and media storage with AWS S3.
Tech: Django, Python, JavaScript, HTML5, CSS3, AWS S3

GLOBU

Full-Stack Travel Experience Sharing Platform [Live Site](#) | [GitHub](#)
Built a full-stack web app for sharing travel stories with image upload, CRUD operations, AWS S3 integration, and responsive UI. Tech: React, Node.js, Express.js, MongoDB, Mongoose, HTML5, CSS3, AWS S3

Meal Planner

CRUD Meal Planning Web App [Live Site](#) | [Github](#)
Built a server-rendered app with full CRUD functionality, EJS templating, and responsive design.
Tech: JavaScript, Node.js, Express.js, MongoDB, Mongoose, EJS, HTML5, CSS3

Spaceman Game

Word Guessing Game [Live Site](#) | [GitHub](#)
Developed a single-page game using event handling, DOM manipulation, and custom animations. Tech: JavaScript, HTML5, CSS3

Professional Experience

General Assembly

Software Engineer Fellow

Remote
April 2025 – July 2025

- Gained experience in JavaScript, React, Python, Node.js, Express, and MongoDB through project-based learning.
- Built and deployed 3 individual and 1 team-based project using Agile workflows and Git.
- Created responsive UIs and RESTful APIs, integrated AWS S3, EJS templating, and Mongoose for schema modeling.

ByartGroup

Sales and Export Specialist

Ankara, Turkey
December 2021 – May 2024

- Managed B2B export operations for industrial products across Europe and the Middle East.
- Used ERP systems to track shipments, manage sales workflows, and maintain documentation accuracy.
- Collaborated cross-functionally during client assessments and solution planning.
